Dear Permittees, Interested Public, State Agencies, and local Government:

The enclosed CD contains information being used to prepare an Environmental Assessment (EA) for a grazing permit renewal of the East Castle Creek Allotment, Bruneau Field Office, Boise District BLM. A portion of the allotment is within the Little Jacks Creek Wilderness Study Area (WSA).

This DRAFT Document, just one part of our ongoing scoping process, includes the Purpose and Need, Affected Environment, an overview of the Alternatives currently being considered for analysis, and a preliminary discussion of impacts that may be expected under each of the alternatives.

We are providing this CD for your review and comment; particularly, your ideas on the Alternatives, being considered. You can also view this document on the BLM web site at <http://www.blm.gov/id/st/info/nepa.2.html>; look under Bruneau Field Office, East Castle Creek; Scoping document. Comments must be received by October 31, 2008, so that Bruneau Field Office can proceed in a timely manner to complete an EA and prepare the decision.

If you would prefer a paper hard-copy instead or have questions, please contact Arnie Pike, Field Manager, at 208-384-3331 or Pam Druliner, Ecologist, at 208-384-3212.

Sincerely,

Michael O'Donnell
Acting Field Manager
Bruneau Field Office
